

# Eugene Prygoff (Evgeniy Prygov), 06.12.1974

**Cell phone:** (976) 99734975, email: eugene@prygoff.com, Skype: vedenev, <http://www.linkedin.com/in/prygoff>

**Citizenship:** Russia, residing in Mongolia with family by investor visa;

**Currently:** Self-employed in New Vetus LLC, Geophysical consulting company, director and founder.

## Summary

- Quality Control on any type of geophysics: starting from survey design and ending with outcomes transfer with in-depth understanding of physical principles, QC standards and reporting routine.
- Independent geophysical data processing on the field; macro management; planning; logistics... – whatever is required to get survey done.
- Able to work with any IT/specialized software and hardware; good experience on in-field equipment repair.
- Market research of local / global contractors and conducting tenders for certain amount of geophysical work.
- Proficiency in GIS and navigation systems, designing of maps and presentation materials; understanding of remote sensing techniques.
- Excellent knowledge of Mongolian geophysical market.
- Core understanding of the exploration needs, conditions, communication requirements, supply chain for the sites working in the any conditions (-50C, +50C/, remoteness from the civilized places).
- Good verbal conversation & team management skills (native Russian, working English, basic Mongolian languages).
- Understanding and basic skills of branding, trademark design and market promotion; Web design skills and experience with projects done in the all of noted areas.
- Experience of implementing few types of ground survey from the scratch.

## Specialties

Geophysical borehole logging supervisor/operator/party chief; Ground Magnetic operator/data processor/party leader; Car-borne Radiation survey party leader/operator; Geophysical data processing specialist (CAD and GIS, Magnetic, Gravity, Borehole, seismic - partially); 2D Seismic QA/QC; Gravity QC; Technician (computers and networking, communication, electronic, electric); System administrator; Web-designer; Graphical designer; Data manager; Data security specialist; Project manager.

## Experience

### Director and founder at New Vetus LLC.

August 2011 – present time. Consulting on Geophysical Exploration / IT, Mongolia.

- Full circle of supervision of 2D Seismic / Gravity surveys for vary clients; Survey design; public tenders.

### Geophysical field supervisor at Petro Matad LLC.

June 2010 – July 2011. Oil Exploration, Mongolia.

- Seismic QA/QC in few 2D Surveys; scouting trips; survey design.

### Field party leader and geophysical logging supervisor at associated companies of Pty Prosperity Resources.

June 2007 – June 2010. Mining/Exploration, different locations.

- Zaraya LLC, Gobi Coal & Energy LLC (Mongolia, Dornogovi, Bayankhongor, Govi-Altai); PT ProspIndo, Multy Mineral Utama (Indonesia, Sumatra), PT ParamIndo (Indonesia, Java), Iliria Mining (Kosovo, North-South), Ottoman Resources (Turkey, Kapadokia).
- Survey: design, procedure, operations, data processing in areas of: Ground Magnetics, Spectrometry (incl. car-borne), sample and core assays, borehole logging. Equipment installation and maintenance, team building and management, reporting and interpretations. Founding company own geophysical unit (Zaraya).

### Geophysical logging supervisor at Monkarotaj LLC

April 2006 -June 2007, Geophysical services, Mongolia

- Company representative on site, team management, equipment maintenance, data processing in area of borehole logging.

## Also:

Market analyst at 2Mobile, Moscow Russia. (Value added services for mobile communications); Marketing manager at Betline, Moscow Russia. (Online games); BizDev manager at DATA FORT (IBS group), Moscow Russia (Disaster recovery and co-location services); Marketing manager at Elvis Plus, Moscow Russia. (Information security solutions); CEO and co-founder at Kubic, Krasnodar, Russia. (Internet mass-media, web projects); Head of BizDev department at Pervomaisky Bank, Krasnodar, Russia. (Banking services); Head of web-design department at SB, Krasnodar, Russia. (Internet provider); Interpreter, computer technician at DDK, Krymsk, Russia. (Fertilizer trading); Marketing manager, co-founder at Incomsoft, Moscow Russia. (Banking services); Reporter, author, at Computerra, Moscow Russia. (Computer weekly magazine);

## Education

**Moscow Technical University (former Moscow Institute of Electronic Tech.) – MIEE.** Computing system and networks, 1993 -1995

**Activities and Societies:** CAD engineering systems, programming.

Not graduated.

## Recommendations (as listed in LinkedIn.com)

### **Timothy Larum, Owner, Larum Support Services**

"Eugene is a quick learner and multi-talented individual. No task is too tough for him to accomplish."

---

### **Dragan Djordjevic, Geologist, Gobi Coal and Energy, managed Eugene indirectly at Zaraiya Holdings Limited**

"In the last two seasons I had pleasure to work with Eugene in two companies: Zaraiya Holdings Limited and Gobi Coal and Energy, where I was in a position of senior level. Our management employed Eugene because he performed a high quality of geophysical activities. Especially I would like to highlight his cleverness and knowledge of scientific (geology) software which were very useful for data assessment. I also highlight his big capacity for learning new languages. My opinion is that his positive spirit is and team leading skills will show in Eugene's work."

---

### **Gordon McLean, Principal Exploration Geologist, Explorinfo, worked with Eugene at Ottoman Resources**

"Eugene has very good ground magnetic data handling skills and is dedicated to collecting quality data. I found him to be an able problem solver, and willing to contribute to the project in more than just his specialty."

---

### **Mike Pole, Geologist with Gobi Coal and Energy, worked directly with Eugene at Zaraiya Holdings Limited**

"I have known Eugene for more than two years and have worked with him in the field. I can say that he is a dedicated, diligent worker -willing to work hard, long days in trying conditions (Mongolia, Turkey, Indonesia) and then follow up on his field work with a professional report. He is also very smart in a wide range of technical expertise and gets along very easily with his colleagues, as well as local contacts. I would have no hesitation at recommending Eugene to a prospective employer."

---

### **Michael Sullivan, Senior Geologist, Zaraiya Holdings LLC, worked indirectly for Eugene at Zaraiya Holdings Limited**

"Eugene was a senior geophysicist and I was a senior geologist for Zaraiya Holdings, LLC in 2008. Eugene is a self-driven leader and team player. He contributes 100 percent of his time to projects. I was fortunate to be assigned to his geophysical survey team during my last three weeks in the field. Eugene is an excellent communicator and is a pleasure to work with both in the field and in the office. Eugene is also a good supervisor and takes pride in the people he selects or hires for his projects. Eugene and I adhere to similar work principles. We like to solve problems with research and field observation. Both of us have an appreciation of the geosciences and digital mapping. I consider Eugene a trusted co-worker and a genuine friend."

---

### **Andy Evans, Camp Manager, QGX Mongol LLC, worked with Eugene at Monkarotaj LLC**

"Eugene is a determined, contentious, 'let's do it' guy. Adverse conditions, multi cultural environments, difficult logistical routes...that's where you will find him...adding value to the company. Fluent in English, Russian and Mongolian, extremely knowledgeable in all computer aspects and geophysical logging...hands on, not just an academic...moi malchick!"

---

### **Katia Norkina, Worked directly with Eugene at 2Mobile**

"Ghenia knows how -if you look for any know-how support for your business, he's a right person for you. It was great to work with you and to study from you."
